CHARGE YOUR  
CHANGAN WITH GOOD  
ENERGY

## CHARGE THE E-STAR **AT HOME**

There are several possibilities to charge the Changan E-STAR comfortably, quickly and safely, you can choose the one that best suits your needs. At home, it is best to have a 220V wall charger.

**Wall Charger 220V:** In 8 hours of connection it recovers 300 km of autonomy

## CHARGE THE E-STAR OUT OF HOUSE IN SHOPPING CENTERS AND ELECTROLINES.

Charging points are gradually being installed in many places.

**Ultra Fast Charging:** Through the connector located on the back, in just **30 minutes** it recovers **150 km** of autonomy in an electric charging station with a GB/T DC type connector.

**Standard Charge:** In shopping malls and public parking lots, you can connect the E-STAR to Type 1 chargers and in **3 hours** it recovers **100 km** of autonomy.

## PORTABLE CHARGER INCLUDED WITH YOUR E-STAR

It allows charging in an agile and mobile way thanks to its waterproof casing and the 4.5 meter cable length. It is suitable for 110V or 220V connection.

### **220V Connection:**

In **10 hours** it recovers an autonomy of **300 km**.

### **Occasional charging at 110V connection:**

While at home (**12 hours**), recovers **100 km** of autonomy.
